

GAIA

We are confronted with global warming and the prospect of mankind's end, but we feel almost nothing. Will climate change overcome humankind? What must scientists do in order for people to believe them?

In association with CACS,
UCL's Centre for the Anthropology of Sustainability,
as part of the inaugural conference
'Anthropological Visions of Sustainable Futures'
(12 - 14 February 2015).

The french philosopher, anthropologist and sociologist
Bruno Latour presents at the Bloomsbury Theatre
Gaia-Global Circus an impossible scenario that takes
place in the gap between the high stakes of global
climate change and humanity's lack of emotional
engagement.

This is followed by a
question and answer session with Bruno Latour.
